## DETAILED ACTION

1. This application contains inventions drawn to patentably distinct species. Applicant is required under 35 U.S.C. '121 to elect:

- A) a method employing a **specific** synthetic peptide, comprising either a single peptide, a dual synthetic peptide, or a peptide polymer, further comprising SEQ ID NO:1-5 or 7-10 or a **specific** combination of said SEQ ID NOS:,
- B) and list all Claims readable thereon including those subsequently added. Currently Claim 1 is generic.
- 2. Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

The different peptide motifs comprise different amino acid sequences with different biological activities. Therefore, methods employing the species are independent and patentable over one another.

- 3. Applicant is advised that the response to this requirement to be complete must include an election of the species to be examined even though the requirement be traversed.
- 4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Dr. Gerald Ewoldt whose telephone number is (703) 308-9805 The examiner can normally be reached Monday through Thursday from 7:30 am to 5:30 pm. A message may be left on the examiner's voice mail service. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Christina Chan can be reached on (703) 308-3973. Please note: any inquiry of a general nature or relating to the status of this application should be directed to the Technology Center 1600 Customer Service Center at (703) 308-0198.
